DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-33, 52-84 and 103-136, drawn to a method, system and the associated computer hardware for providing solutions to problems, classified in class 705, subclass 35.
- II. Claims 34-51, 85-102 and 137-157, drawn to a method, system and the associated computer hardware for the preparation and selection of trading securities, classified in class 705, subclass 37.

Inventions from Group I and Group II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions because the invention of Group I is directed to a method of providing solutions to problems which is somewhat general in nature whereas the invention of Group II is directed more specifically to the preparation and selection of trading securities.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
